

Regeneron to Host Investor Call and Webcast on December 14, 2023 to Provide Updates Across Its Hematology Portfolio

November 30, 2023 at 4:05 PM EST

TARRYTOWN, N.Y., Nov. 30, 2023 (GLOBE NEWSWIRE) -- Regeneron Pharmaceuticals, Inc. (NASDAQ: **REGN**) will host a conference call and simultaneous webcast to provide an update on the company's hematology portfolio on Thursday, December 14, 2023 at 8:30 AM ET. This investor call follows Regeneron data updates presented at the 65th American Society of Hematology (ASH) Annual Meeting and Exposition, from December 9-12, 2023.

The webcast may be accessed from the "Investors & Media" page of Regeneron's website at <https://investor.regeneron.com/events-and-presentations>. To participate via telephone, please register in advance at this [link](#). Upon registration, all telephone participants will receive a confirmation email detailing how to join the conference call, including the dial-in number along with a unique passcode and registrant ID that can be used to access the call. A replay and transcript of the webcast will be archived on the Company's website for at least 30 days.

About Regeneron

Regeneron is a leading biotechnology company that invents, develops, and commercializes life-transforming medicines for people with serious diseases. Founded and led for 35 years by physician-scientists, Regeneron's unique ability to repeatedly and consistently translate science into medicine has led to numerous FDA-approved treatments and product candidates in development, almost all of which were homegrown in Regeneron's laboratories. Regeneron's medicines and pipeline are designed to help patients with eye diseases, allergic and inflammatory diseases, cancer, cardiovascular and metabolic diseases, hematologic conditions, infectious diseases, and rare diseases.

Regeneron is accelerating and improving the traditional drug development process through its proprietary *VelociSuite*[®] technologies, such as *VelocImmune*[®], which uses unique genetically humanized mice to produce optimized fully human antibodies and bispecific antibodies, and through ambitious research initiatives such as the Regeneron Genetics Center[®], which is conducting one of the largest genetics sequencing efforts in the world.
