

More than \$9 Million Awarded to High School Scientists and Engineers at the Regeneron International Science and Engineering Fair 2024

May 17, 2024 at 1:45 PM EDT

Updated May 24, 2024: This press release was revised to reflect the removal of one award.

Grace Sun, 16, receives \$75,000 Top Award for a new kind of organic electrochemical transistor at the world's largest pre-college science, technology, engineering and math (STEM) competition.

TARRYTOWN, N.Y. and WASHINGTON, D.C., Updated as of May 24, 2024 (GLOBE NEWSWIRE) – Regeneron Pharmaceuticals, Inc. (NASDAQ: REGN) and Society for Science (the Society) announced that Grace Sun, 16, of Lexington, Kentucky, won the \$75,000 top award, the George D. Yancopoulos Innovator Award, named in honor of the pioneering drug researcher and Regeneron co-Founder, Board co-Chair, President and Chief Scientific Officer, in the 2024 Regeneron International Science and Engineering Fair (Regeneron ISEF), the world's largest pre-college science and engineering competition. Other top prizes went to projects in second-order cone programming, microplastics filtration and multi-sensory therapy for dementia.

The top winners were honored during two award ceremonies: the Special Awards on May 16 and the Grand Awards Ceremony on the morning of May 17. In total, over \$9 million USD was awarded to the finalists based on their projects' creativity, innovation and depth of scientific inquiry. The competition featured nearly 2,000 young scientists representing 49 U.S. states and nearly 70 countries, regions and territories across the world.

[Grace Sun](#), 16, of Lexington, Kentucky, won first place and received the \$75,000 George D. Yancopoulos Innovator Award for her research on building a better organic electrochemical transistor that she hopes will be used to develop new electronic devices that could help detect and treat serious illnesses like diabetes, epilepsy and organ failure. To overcome the problems that have previously prevented such devices from working effectively inside the body, Grace developed a new way of chemically treating their organic components, which greatly improved their laboratory performance.

[Michelle Wei](#), 17, of San Jose, California, received the Regeneron Young Scientist Award of \$50,000 for her research to improve the speed and efficiency of a type of software that is useful in many fields such as machine learning, transportation and financial systems. Michelle's new approach involved determining a quick approximate solution to the second-order cone programming problem, then splitting the initial cone into smaller cones, which enabled her new algorithm to greatly outperform previous approaches.

"Congratulations to the Regeneron International Science and Engineering Fair 2024 winners," said Maya Ajmera, President and CEO, Society for Science and Executive Publisher, Science News. "I'm truly inspired by the ingenuity and determination shown by these remarkable students. Coming from around the world with diverse backgrounds and academic disciplines, these students have shown that it is possible to come together in unity to tackle some of the toughest challenges facing our world today, and I could not be prouder."

Regeneron ISEF provides a global stage for the world's best and brightest young scientists and engineers. Through this competition, Regeneron and the Society are fostering the next generation of STEM leaders who are pioneering solutions to improve our world. Since 2020, Regeneron has provided STEM experiences to approximately 2.4 million students, on track to meet its goal of 2.5 million by 2025.

"The talent, intelligence and potential of this year's Regeneron ISEF finalists is truly inspiring, and I congratulate each on their remarkable achievements," said George D. Yancopoulos, M.D., Ph.D., co-Founder, Board co-Chair, President and Chief Scientific Officer of Regeneron. "Science competitions like ISEF were pivotal in shaping my own career and fueling my passion to fight back against disease. I look forward to seeing these students continue to push the boundaries of science and technology to create positive and sustainable change for all humanity."

Other top honors from the competition include:

[Justin Huang and Victoria Ou](#), both 17, of Woodlands, Texas, received the Gordon E. Moore Award for Positive Outcomes for Future Generations of \$50,000 for their new prototype filtration system that uses ultrasonic waves to remove microscopic plastic particles from water. In lab tests, the acoustic force from the high-frequency sound waves removed between 84% and 94% of the suspended microplastic particles in a single pass. The students are now working to scale up and fine-tune their experimental system.

[Ingrid Wai Hin Chan](#), 17, of Hong Kong, China received the Craig R. Barrett Award for Innovation of \$10,000 for her research on using a multi-sensory therapy for dementia patients. Her mixed therapy app would allow patients to practice physical and cognitive

skills through a personalized, immersive environment using virtual reality headsets. Ingrid conducted an eight-week study with six people living with dementia and found that the cognitive function of patients who used her prototype improved in several areas. She believes her app could serve as a viable option for dementia patients with limited access to in-person professional therapy.

[Tanishka Balaji Aqlave](#), 15, of Valrico, Florida, received the H. Robert Horvitz Prize for Fundamental Research of \$10,000 for her investigation into a natural alternative treatment against citrus greening, a disease that threatens citrus farming in many parts of the world and is currently only treated with antibiotics. Tanishka injected the trunks of infected trees with an extract from the curry leaf tree, and found through tests that this potential method could effectively and sustainably manage citrus greening disease.

[Maddux Alexander Springer](#), 18, of Honolulu, Hawaii, received the Peggy Scripps Award for Science Communication of \$10,000 for his research into fibropapillomatosis (FP), a disease that is the primary cause of death in green sea turtles. Some turtles he studied in Kaneohe Bay, Hawaii, were stricken with a disease that causes internal and external tumors that inhibit their everyday lives. After analyzing the turtles' diet of green algae, Maddux concluded that this disease, wastewater, invasive algae and the amino acid arginine all pose a grave risk to these endangered sea creatures.

[Ria Kamat](#), 17, of Hackensack, New Jersey; [Anna Oliva](#), 17, of Houston, TX; and [Shuhan Luo](#), 18, of Worcester, MA, received the Dudley R. Herschbach SIYSS Award, which provides finalists an all-expense paid trip to attend the Stockholm International Youth Science Seminar during Nobel Week in Stockholm, Sweden.

[Jack Shannon](#), 18, of Clane, Kildare, Ireland, and [Nikhil Vemuri](#), 17, of Cary, North Carolina, received the EU Contest for Young Scientists Award. Their projects will represent Regeneron ISEF at the EU Contest for Young Scientists to be held this September in Katowice, Poland.

The full list of Special Award ISEF 2024 Finalists can be found at <https://www.societyforscience.org/press-release/regeneron-isef-2024-special-awards-winners>.

In addition to the Top Award winners, more than 450 finalists received awards and prizes for their innovative research, including "First Award" winners, who each received a \$5,000 prize.

The following lists the First Award winners for each of the 22 categories, from which the Top Awards were chosen:

Animal Sciences, sponsored by Society for Science

Maddux Alexander Springer, Honolulu, Hawaii

Behavioral and Social Sciences, sponsored by Society for Science

Andrew Y. Liang, San Jose, California

Biochemistry, sponsored by Regeneron

Amy Hong Xiao, Garden City, New York

Biomedical and Health Sciences, sponsored by Regeneron

Ria Kamat, Hackensack, New Jersey; Kevin Xuan Lei, Shanghai, China

Biomedical Engineering, sponsored by Alfred E. Mann Charities

Ayush Garg, Dublin, California; Divij Motwani, Palo Alto, California; Akash Ashish Pai, Portland, Oregon

Cellular and Molecular Biology, sponsored by Regeneron

Lara and Maya Sarah Hammoud, Beverly Hills, Michigan

Chemistry, sponsored by Society for Science

Akilan Sankaran, Albuquerque, New Mexico; Arjun Suresh Malpani and Siddharth Daniel D'costa, Portland, Oregon

Computational Biology and Bioinformatics, sponsored by Regeneron

Kun-Hyung Roh, Bronx, New York

Earth and Environmental Sciences, sponsored by Google.org

Nikhil Vemuri, Durham, North Carolina; Justin Yizhou Huang and Victoria Ou, The Woodlands, Texas

Embedded Systems, sponsored by HP

Chloe Rae and Sophie Rose Fillion, Welland, Ontario, Canada

Energy: Sustainable Materials and Design, sponsored by Siemens Energy

Alia Wahban, Hamilton, Ontario, Canada

Engineering Technology: Statics and Dynamics, sponsored by Howmet Aerospace Foundation

Chiyo Nakatsuji, Bunkyo-ku, Tokyo, Japan; Kevin Shen, Olympia, Washington

Environmental Engineering, sponsored by Jacobs

Jack Shannon, Clane, Kildare, Ireland

Materials Science, sponsored by Howmet Aerospace Foundation

Grace Sun, Lexington, Kentucky

Mathematics, sponsored by Akamai Foundation

Anna Oliva, Houston, Texas

Microbiology, sponsored by Schattner Foundation

Matthew Chang, Irvine, California

Physics and Astronomy, sponsored by Richard F. Caris Charitable Trust II

Harini Thiagarajan and Vishal Ranganath Yalla, Bothell, Washington; Shuhan Luo, Worcester, Massachusetts

Plant Sciences, sponsored by Society for Science

Pauline Estrada, Fresno, California; Tanishka Balaji Aglave, Dover, Florida

Robotics and Intelligent Machines, sponsored by Regeneron

Michal Lajciak, Dubnica nad Vahom, Trenčiansky kraj, Slovakia; Anthony Efthimiadis, Oakville, Ontario, Canada

Systems Software, sponsored by Microsoft

Michelle Wei, San Jose, California

Technology Enhances the Arts, sponsored by Society for Science

Anant Khandelwal, Sritan Motati and Siddhant Sood, Alexandria, Virginia

Translational Medical Science, sponsored by Regeneron

Zheng-Chi Lee, West Lafayette, Indiana; Ingrid Wai Hin Chan, Hong Kong, China

The full list of all award-winning ISEF 2024 finalists is available here: <https://www.societyforscience.org/press-release/regeneron-isef-2024-full-awards>.

About the Regeneron International Science and Engineering Fair

The Regeneron International Science and Engineering Fair (Regeneron ISEF), a program of Society for Science for over 70 years, is the world's largest global science competition for high school students. Through a global network of local, regional and national science fairs, millions of students are encouraged to explore their passion for scientific inquiry. Each spring, a group of these students is selected as finalists and offered the opportunity to compete for approximately U.S. \$9 million in awards and scholarships.

In 2019, Regeneron became the title sponsor of ISEF to help reward and celebrate the best and brightest young minds globally and encourage them to pursue careers in STEM to positively impact the world. Regeneron ISEF is supported by a community of additional sponsors, including Akamai Foundation, Alfred E. Mann Charities, Aramco, Caltech, Google.org, Gordon and Betty Moore Foundation, Howmet Aerospace Foundation, HP, , Jacobs, King Abdulaziz & his Companions Foundation for Giftedness and Creativity, Microsoft, National Geographic Society, Richard F. Caris Charitable Trust II, Rise, an initiative of Schmidt Futures and the Rhodes Trust, Schattner Foundation, Siemens Energy, Annenburg Foundation, Ballmer Group, Broadcom Foundation, Cesco Linguistic Services, Conrad N. Hilton Foundation, Edison International, Insaco, Oracle Academy, The Eli and Edythe Broad Foundation, The Ralph M. Parsons Foundation and US Army ROTC. Many are entrepreneurs across a wide range of industries. Learn more at <https://www.societyforscience.org/isef/>.

About Society for Science

Society for Science is a champion for science, dedicated to promoting the understanding and appreciation of science and the vital role it plays in human advancement. Established in 1921, Society for Science is best known for its award-winning journalism through Science News and Science News Explores, its world-class science research competitions for students, including the Regeneron Science Talent Search, the Regeneron International Science and Engineering Fair and the Thermo Fisher Scientific Junior Innovators Challenge, and its outreach and equity programming that seeks to ensure that all students have an opportunity to pursue a career in STEM. A 501(c)(3) membership organization, Society for Science is committed to inform, educate and inspire. Learn more at www.societyforscience.org and follow us on Facebook, Twitter, Instagram and Snapchat (Society4Science).

About Regeneron

Regeneron (NASDAQ: REGN) is a leading biotechnology company that invents, develops and commercializes life-transforming medicines for people with serious diseases. Founded and led by physician-scientists, our unique ability to repeatedly and consistently translate science into medicine has led to numerous approved treatments and product candidates in development, most of which were homegrown in our laboratories. Our medicines and pipeline are designed to help patients with eye diseases, allergic and inflammatory diseases, cancer, cardiovascular and metabolic diseases, neurological diseases, hematologic conditions, infectious diseases and rare diseases.

Regeneron believes that operating as a good corporate citizen is crucial to delivering on our mission. We approach corporate responsibility with three goals in mind: to improve the lives of people with serious diseases, to foster a culture of integrity and excellence and to build sustainable communities. Regeneron is proud to be included on the Dow Jones Sustainability World Index and the Civic 50 list of the most “community-minded” companies in the U.S. Throughout the year, Regeneron empowers and supports employees to give back through our volunteering, pro bono and matching gift programs. Our most significant philanthropic commitments are in the area of early science education, including the [Regeneron Science Talent Search](#) and the [Regeneron International Science and Engineering Fair \(ISEF\)](#).
